BIG PLANT FOR THE TESORA MINE

The Directors Decided Yesterday to Build a 150-Ton Mill.

TO BE FINISHED IN 90 DAYS

Sues the Buckeye Company- Lower Mammoth Drop - Smelter Company's Far Reaching Plans.

The directors of the Tesora Mining company held a meeting yesterday afternoon at which the erection of a 150ton concentrating plant was decided upon. This information was given out today by Manager O. P. Posey. The plant is to be modern in every particular. Work is to be commenced on it as soon as possible and Mr. Posey expects it to be completed within 90 days.

This decision is the result of the recent tests on the ore at the Dewey mill at Bingham, where the concentration was very satisfactory. The ore went about 3 into 1, and the concentrates were valued at about \$14 per ton. Col. Heffron said today that the company has 5,000 tons of milling ore brok. en down, the concentrates from which will have a value of about \$14 per ton. This lot of ore will net the company \$10 per ton on the concentrates after defraying the costs of milling. From the above amount of ore it is expected that \$17,000 will be derived, which will go a long ways toward paying for the erection of the new plant, the cost of which is placed at \$20,000. An estimate of the amount of ore in sight could not be learned today but that the quantity is great can be seen from the present decision, which no doubt has been acted upon at Mr. Duncan McVichie's suggestion. It was learned today that the Tesora company is able already to meet some of the costs of construction from recent sales of ore. Col. Heffron says a nice little balance is in the treasury, but it is not known whether the company will go in debt for the balance or levy an assessment. During the past few months, or since Nov. 1st, the company has marketed 83 carloads of first class ore. Two more are now at the sampler, making a total of 85 cars These shipments have been sold to the Bingham Copper & Gold company under contract, which, at the time it was made, insured nearly \$2.00 per ton more than the American Smelting company paid. The profits in the past three months have averaged about \$3,000 per month, and it is not likely that this sum will be raised very much until the mill is built, which is expected to re-

GRAND CENTRAL MEETING.

Dividend Passed - Judge Marioneux Refuses to Continue Injunction. [SPECIAL TO THE "NEWS."]

mine directors held their regular monthly meeting today and transacted the usual routine business. In view of the purchase of a half interest in the King William and Wedgewood claims for \$180,000, it was deemed the part of visdom to pass the monthly dividend. President Holbrook stated to correspondent that the work which had been temporarily suspended on account of the Mammoth smoke scheme, would be resumed very short-He received word today to the efthat Judge Marioneaux had refused to continue the injunction which warranted him in the belief, he said, that the Mammoth smoke tactics would cease. If not, he declared that legal stens would be taken to that end.

Regarding the statement of Mr. Mc-Intyre, he says that after Judge Higgins' decision of December 29th, which raised the injunction against certain ground by the Grand Central company, that the latter went to work on ground previously enjoined within ten feet of the Mammoth mine on the 800 foot level. He further says that Mr. Mc-Intyre went into the mine with Super-intendent Donnelly of the Grand Central and agreed not to disturb this ten foot strip until the rights of the respec had been settled tive companies Mr. Holbrook's contention is that his company faithfully kept but that Mr. McIntyre caused an underground survey to be made to conform to a surface survey which took twenty-five feet from the Grand Central and then notified the latter to stop working. A prompt refusal was entered after which the smoking business commenced.

THE LOWER MAMMOTH. Conditions at the Mine Do Not War rant a Decline in Stock.

When questioned today regarding the cause of the marked decline in Lower Mammoth Manager Simon Bamberger stated that the drop was not caused by any change at the mine. A report had been brought to town that the ore had pinched, but this was denied by Mr. Bamberger, who said the mine was not changed from what it was a week The extraction of ore is going or and a shipment it is said will be on the market early next week.

THE BUCKEYE TROUBLE.

Charles E. Hudson the Broker Suc the Company for \$300.

Charles E. Hudson commenced suit today in the district court against the Buckeye Mining company for \$300 and interest thereon from January 19 1900, and for cause of action plaintiff alleges that he purchased 10,000 shares of Buckeye Mining stock from Thomas Harkins on December, 23, 1899, and prented the same to the proper offiof the plaintiff for transfer on its books to his name, tendering the necessary fees therefore, but defendant refused now refuse to make transfer, to his damage in the sum stated, for which he prays judgment,

IS LAYING ITS PLANS.

The Big Smelter Company Preparing to Start a More Aggressive Policy. According to the Denver Post far reaching plans for the betterment of

the American Smelting & Refining com-pany are being formulated by the leaders of that powerful concern. Vice President James B. Grant has returned from Omaha, where he has been con-ferring with President Guy Barton on matters connected with the recent Gug. genheim consolidation, which he says, means greatly increased facilities for handling ore in the near future. The company is watching mining operations in other countries and the officers are said to be in favor of a more aggressive and economical policy which will greatly affect South America and other

Ore will now be shipped from the mines to the nearest smelting plant owned by the consolidated company. Ores from Creede and the San Juan district which have been coming to Denver will be stopped at Pueblo and the extra freight saved. Likewise, ore which has been going through Denver to Pueblo will be smelted here.

The rich silver ores from South America which are brought to this country by the shipload will continue to come north for awhile. Ultimately, however, a great smelter will be built in South America near the mines, and the costly transportation by hand and water abolished. The present smelter at Anto Fogasta, on the west coast, is a good plant, but the increasing output of the big lodes makes the erection of another merely a question of time.

Lead, it is expected, will be found in South American mountains before long. At present there is so little of the soft ore that the west coast smelter must be supplied from other lands. The Perth Amboy (N. J.) smelter will continue to receive ore from the south and matte from Tasmania, Mexico and Australia will receive prompt treat-

MINING NOTES.

The May Day of Tintic was on the market today with two cars of ore. A car of ore was on the market today from the Excelsior property at Eureka, The Dixon property at Bingham

reached the market today with a car The Silver Shield of Bingham will dis-

tribute its monthly dividend of \$1,500 to-

The Taylor-Brunton sampler reported wo cars of ore from Tintic, one from Nevada, and one from Bingham today. Testimony will be heard by Referce Tingey on an accounting between the Grand Central and Mammoth mining

companies at Nephi on Feb. 11th. Messrs. P. L. Kimberley and W. G. Filer returned from the Annie Laurie at Gold Mountain last night and report

the new mill working smoothly. The Dixie smelter is running again and the expert from New Haven, Conn., who is to make an expert examination of the mine for Eastern people is now

on the ground. Four cars of ore from the Red Wing is at the sampler. A fifth is expected when the lot will be sampled. About 4 feet of ore is said to be in sight in the

Manager Packard of the Star Con. was in town today. He says there is no special change at the mine. The

bins are full of ore and another shipment is being loaded. Secretary Grant of the Silver Cord

has returned from a visit to that Bingham property and reports assays from a 2-foot vein showing 12 per cent copper, \$4.80 gold and some silver.

Mr. Farnsworth reports a continual improvement on the lower levels of the Bullion-Beck as well as in the Muldoon claim. Two fine bodies of ore are reported to have been developed on the

00 and 900 levels. Halley (Ida.) Times: Laura Schwartz of Sult Lake gives notice that she owns ,050 feet in the Silver Crown lode claim in Warm Springs Creek district, Blaine county, Ida., and that the interest in the same claimed by one S. L.Schwartz,

her ex-husband, is held in trust for her. Ex-Gov. J. E. Rickard of Montana is stopping in the city for a few days. Regarding the Montana School of Mines. of which he is president, Mr. Rickard says only about one-fourth of the applicants desiring to enter the school have gained admission and he looks for the ol to maintain a very high stan-

dard in the nation. Claude W. Freed is back from Inyo county, Cal., where he went a nonths ago to direct work at Honths ago to direct work at the Eallarat property. A force of ten men is employed under the direction of F. H. Vahrenkamp, and some very nice gold rock has been opened up, samples of which are being shown by Mr. Freed. It is the intention to make some tests shortly at the Butters Laboroatory in

J. S. Lakin, the well known mining J. S. Lakin, the well known mining man returned to the city this morning from Palo Alta, California, where he has built him a nice home. Mr. Lakin has hardly become accustomed to the ropes there yet, but he is looking towards the oil lands as a place for profitable investment. He will remain in the city about a week looking after his interests here, after which he will leave for the West again.

President Samuel McIntyre of the Mammoth was in conference with his attorneys today regarding the action of the company in smoking out the Grand Central employes. He will be governed by legal advice in the matter. Regarding the matter Judge Ellis says the Mammoth is laboring under a misapprehension as the Grand Central company has not offered to take out a pound of ore from the strip in dispute, which both companies agreed not to touch until a final decision had been

BIG ADVANCE IN CON. MERCUR

The Stock Sold at \$3.221 on the Exchange Today.

BEN BUTLER VERY ACTIVE.

Tesora 14 Better Form - Star Con Softens-Martha Washington Moves Up a Few Points.

Nearly 50,000 shares of stock changed hands on the exchange today for a little over \$13,000. The features of the day were Con, Mercur, Tesora and Ben But-ler. The former jumped to 19 and The former jumped to \$3.22%, at which price 100 shares changed hands. Tesora was very active, at prices rang-ing from 42 at the outset to 43% at the close. The sale of 1,000 shares was reing from 42 at the outset to 43% at the close. The sale of 1,000 shares was recorded during the call at 45. Ben Butler was in good demand today at fair prices. Upwards of 28,000 shares changed hands. Most of the stock was bought at 14, though 9,500 shares were released at 14%, with the closing sales going at 13%. Ajax opened at 81 and after selling down to 50% moved up to 81% at the close. Anchor was let down to \$2.18, while Mammoth opened at \$2.09% and closed with the sale of 200 shares at \$2.10. May Day was traded in from 41% to 41%. Rocco Homestake was active at \$1.01%. Silver Shield released 5,000 shares around 23%. South released 5,000 shares around 23%. South Swansea was weaker at \$1, while Star Swansea was weaker at \$1, while Star Con, was eased off from \$3\% at the opening to \$2\% at the close. Sunshine dropped 100 at 23\%. Swansea was traded in at \$3.80. Valeo on some rumor jumped up to 35 at which price 1,750 shares changed hands. Martha Washington was active at from 5 to 5\%, while Daisy of West Dip sold at \%. FINAL MORTGAGES.

Reorganization of Utah Light & Power Company Legally Completed.

The final act legally in the reorganization of the Utah Light and Power company, which was agreed upon by representatives of the bond and stock holders of its predecessor, in June, 1899, has been consumated by the filing of the mortgages of the new company, with the county recorder.

These mortgages take the place of the old mortgages of the Union Light and Power company under the terms and spirit of the reorganization agreement are called respectively the prior lien (or first mortgage) and the blanket mortgage called the consolidated mortgage.

The prior lien mortgage is in the of June 30, 1899. The mortgages filed The prior lien mortgage is in the sum of \$750,900. The consolidated mortgage contemplates the issuance of \$3,500,000 4 per cent, \$500 bonds, due January 1. 1930, but redeemable at any time at par, after January 1, 1909, to be used as and in the hands of the trustee to take up the 5 per cent, 30 year, \$1,000 bonds issued under the mortgage above described, the company having the option of redemption of said londs, a par, at any time after January 1, 1905 in a manner provided for in the mort-gage. Of the balance \$2,750,000, \$617,000 remains in the treasury for improve-

ments, extensions, etc.
Further provision is made in the consolidated mortgage for the issuance of 4 per cent \$500 bonds in the sum of \$1,-000,000 additional, provided that written assent is obtained from the holders of three-fourths of the preferred and com-

mon stock of the company, and further that the holders of a majority in amount of the bonds issued theretofore, and then outstanding, shall not have protested in writing to the company against said additional issue within 30 days after 15 days' notice of such intention to issue shall have been published in a newspaper of general circuistics. lished in a newspaper of general circu-lation in each of the cities of London, New York and Salt Lake; the company agreeing that it will use the said bonds, or the proceeds therefrom for the pur-poses set forth in the mortgage, i. e., for increasing, extending and developing the light and power plants, or for per-manent betterments or improvements, or for the purchase of new or addi-tional machiney, appliances and equip-ments, etc.

ments, etc. The many legal complications arising from the reorganization of the company have now been adjusted satis-factorily, and titles vested are prop-erly cleared of past incumbrances.

RUSH TO BUY STEEL STOCKS

After the First Sales Price Movements Became Very Uncertain.

Fluctuations in Union Pacific-Railroads Were More or Less Erratic Throughout Bonds Dull.

New York, Feb. 8 .- There was a rush to buy the leading steel stocks at the opening, which made wide quotations for Steel & Wire and Federal Steel. The first sales of Steel & Wire were of 10,000 shares at 52 down to 51, compared with 50% last night, and 5,000 shares of Federal Steel sold from 53 to 52½, compared with 51% last night. Tin Plate jumped 2%. The market otherwise was active at fractional advances for the most part, though there were some important exceptions in small losses. Price movements became very uncertain, but most of the active stocks inclined lower with the movement inter-spersed with frequent railies. Union Pacific lost an opening rise of almost a Pacific lost an opening rise of almost a point and came up strongly again. Tin Plate broke 3½, and recovered to within a fraction of its best. Steel & Wire and Federal Steel got below early prices, while Tennessee Coal, Steel Hoop and Colorado Fuel developed strength. Support in the southwestern division lifted St. Louis Southwestern preferred, Kansas and Texas preferred, and Missouri Pacific about a point. and Missouri Pacific about a point. Stocks which have recently been quiet moved upward I to 2 points, including Anaconda, Amalgamated Copper and Wheeling & Lake Erie second preferred. Western Union, People's Gas, Consolidated Gas and Sugar were bought on a rising scale, the last mentioned advancing two points. But lit-tle interest was manifested in the tractions, and they moved narrowly. These varied movements proved a very erratic market and at 11 o'clock the

tendency was undefinable.

Heavy selling of Union Pacific lowered it and resulted in a lower level for all leading stocks. Steel and Wire lost two points, and a long list of other properties over a point. Despite the general depression there were points of strength in obscure stocks, principally Ohio, and Denver and Rio Grande. The last named ran up 24, after showing heaviness. Before midday there was a good rally in Union and Southern Pacific on the announcement that the Union Pacific bond issue had been written to finance the Union Pacific purchase. Tennessee Coal and Federal Steel also advanced and checked the

Bonds were comparatively dull and irregular. Issues which had earlier in week been bought ran off on realizations.

AMUSEMENT'S. 2.....

Mr. Seabrooke and his surrounding company are so excellent in their various lines, that it is a pity the impartial critic must say anything but words of the highest praise for their work; but not even one's admiration for their talents, should blind him to the fact that in "The Rounders" those talents are but poorly employed. The skit is one of those brilliant coruscations of burlesque, music, humor and dancing, reguarry turned out by the New York Casino. Its tone is of the loudest—we had almost said lewdest—and the display of feminine anatomy is almos It is built, in fact, on the strictly Casino plan for the rounders, by the rounders and of the roundand consequently appeals less ele quently to the more quiet and refined tastes, which we are glad to say, still prevail outside the effete big centers of population. If one could pick his audience, and make it up of experie men and women, there would, perhaps be no harm in a play like "The Round ers." It is bright, clever and most admirably done, but it is not a play to which one would send High school girls and boys with entire confidence. Seabrooke, as a comedian, is a host, Man-deville is another, and Miss Lowrie is a charming looking girl and an equally charming actress. The others are all charming actress. capable, and the chorus, barring the lack of male voices—quite good. The same performance goes tonight and for the remainder of the week.

The "Little Minister" will be seen for the last time tomorrow night. The matinee is expected to be a record breaker for the Grand. The company is now pushing rehearsals on "The Blue and the Gray" and will have it ready for production on Monday night.

The town is being liberally billed for the production of "A Stranger in a Strange Land" at the theater next The engagement opens on the

Manager J. C. Graham of the Prove opera house is in town with his attor-ney, and both have camped on the trail of the Leabrooke company. Mr. Graham has a righteous complaint against the company, which played Provo without Mr. Leabrooke, putting on his understudy in his place, while he came on to this city, as he says, for medical treatment. Mr. Graham says Provo has had this sort of treatment from traveling companies once too often, and e has put in a claim of \$100 damages. If the Leabrooke company does not pay it, he threatens to take legal proceed

COFFEE KNOCKED HIM. Couldn't Move for 4 Hours After Drinking 2 Cups.

When coffee drinking affects a man's health so badly that he has to be put to bed for 4 hours after drinking 2 cups at dinner, it is high time he quit.

That was the experience of Mr. Hood. in Geneva, Mich. His wife writes; consider that Postum saved the life of my husband. For 2 years he had been troubled with his heart, and kept get ting worse. I finally induced him to make the experiment of leaving off cof. fee and taking Postum Food Coffee and he improved rapidly, but one day he drank two cups of strong coffee for dinner and had to lie on the bed four hours before he could move, since that time no coffee is used, but Postum altogether. He has entirely recovered his health, has no more trouble with his heart, and says he likes Postum better than he ever did like the old fashioned

A number of our neighbors use Pos tum altogether to the exclusion ordinary coffee. Once in a while find a person who has tried Postum and does not like it, but always find, upon inquiry, that they tried to make it by boiling it 5 or 10 minutes, which absolutely will not do. It must be boiled 15 or 20 minutes after the boiling be-gins. Put in a little piece of butter to prevent it from boiling over, and you will have a delicious, palatable and nourishing beverage." Ada Hood, Geneva, Mich.

PEOPLE WHO ARE PASSING

L, H. Roberts, an expert mining en-gineer, well known to mining men in all parts of the country, and former professor of mines at the School of Mines at Boulder, Colorado, is a guest at the Knutsford.

Judge J. D. Flenner, the editor of the Boise Capital, is a guest at the Kenyon. The Boise Capital was recently sold by the former owner, Mr. Lewis, to Oregon parties for \$15,000, but Editor Flenner was retained in that capacity. In speaking of Idaho, Judge Flenner said. "We have one of the finest States in the Union, and just now the people all the Union, and just now the people all over the State are prosperous. Our cattle and sheep industries were never in such a fine condition and in certain parts of the State settlers are looking into the agricultural development of the country with such energy, and the railroads have been so active in forward-ing the interests of Idaho that I believe this year will be one of remarkable growth both in population and business." The judge is a distinguished Fusionist, and came to the city to escort the Utah Legislature to the Idaho

Attorney S. A. King of Provo and N. A. Page of Park City are at the Knuts-

President Kimberley of the Annie Laurie mine has been suffering lately from severe attacks of rheumatism and hurried back from the mine last night on a special train that he might be He is at the Knutsford

S. A. McLean and Lorenzo Hatch are at the Knutsford. They just came from the La Sal mining district and report that the district is very lively and that the indications are that it will become one of the greatest mining camps in the West. "What we need is a railroad," said Mr. McLean, "and it looks now as if we shall soon have a branch of the R. G. W. to Richardson. The company s already having the surveys made for In the spring an electric this spur. will be built on the Grand river at Richardson, and an electric tramway run up to the mines. With these im-provements and facilities for transportation of machinery and other things, La Sal will become a very great camp indeed, for they have found the ore

there in quantities."
G. S. Hoagland, a prominent merchant of St. Anthony, Idaho, is at the Kenyon. Mr. Hoagland is widely con-Kenyon. nected with the business interests of Fremont county in southern Idaho and believes that in another year or so there will be several times the present popu-lation in that county. "Most of our lation in that county. "Most of our people are from Utah, and are progressive," said Mr. Hoagland. "Our indus tries are cattle and sheep raising and agriculture. We have over half a million sheep and range land for many times that number. A new power plant s under contemplation and other improvements are going on.'
